About This Game

Dead by Death is a retro style platformer. The hero will explore dungeons where are full of traps and find out hidden secrets. To defeat monsters till you die or live for glory.

Features:

- This is an indie game developed by one person, so I can't make everyone satisfied
- 36 well-designed adventure dungeons
- Many kinds of interesting and powerful weapons
- Various enemies and traps
- Discover secrets and collect treasures for skill upgrades

Tips:

- Player need to explore every corner of the dungeon to find treasures or keys.

-
- The pistol plugin and the grenade plugin are very effective against enemies not at the same height. The scattergun can help you effectively attack enemies in all directions.
 - Character with proper resistance and inertia is a consistent feature of this kind of game, which has a certain test of the player's ability to control, if you can adapt to certain game series, such as Mario, Shovel Knight, Momodora or Castlevania, I think the feel of this game is hard to beat you.
 - Find out the rules of the enemy, don't be hard.
 - Not only to improve the crit rate and attack power, but also to be careful of various traps.
 - Increase maximum health at the right time may be suitable for most players.
 - Every part of the level has been carefully designed and considered. Be sure to find out the rules and just use the various props and weapons in your hands on time!
 - Although there's no dialogue, you can feel my existence in the game, see you in the game!

This is a flash game. Straight up. I don't care what anybody says, this shouldn't be sold on Steam for money. In fact, there are way better, more complex flash games out there, that you can get for free. This game attempts to be a Castlevania clone, but it lacks some of the most basic features. It only uses 3 buttons, if you don't count movement keys and weapon switching keys. One button is to shoot, one for melee and another one is a jump button. I don't think we can talk about any depth in gameplay with this. You can't even crouch, which was a feature in the very first Castlevania for NES. Enemy designs are atrocious, everything has this cheap anime look to it, and animations look unnatural. The menu and inventory are clunky and lack options. This game would only be tolerable on mobile devices or in a web browser. In fact, I wouldn't be surprised, if it's available on either of those and was made with that intention.
